

AERIALCAT™ MIDMOUNT PLATFORM

KME has a full line of mid-mount platforms with travel heights as low as 119", allowing your department to maneuver in low-clearance environments. The KME Midmounts also feature a short overall length from 42' to 47', allowing you to navigate the tightest areas. However, low travel heights and short overall length don't equal small storage capabilities. KME mid-mount aerials allow for storage of 1,000' of LDH hose, a minimum of 115' of ground ladders, 300 gallons of water and plenty of storage space.

AERIALCAT™ MIDMOUNT PLATFORM

KME's platform has an elevation range that allows you to go -12° below horizontal without any impact on platform capacity and while flowing water.

KME Midmount Platforms are designed to fit your station, terrain, and department's demands.

FEATURES

- IQAN Motion Control System
- Luminescent Rung Covers
- -12° to 80° Elevation Range
- 119", 128" & 132" Travel Heights
- 100,000 psi Steel Platform Structure
- Roof Ladder & Stokes Basket Options
- Clean Underslide of Platform
- Industry Leading Platform Design

CUSTOMIZED TO YOUR REQUIREMENTS

KME offers a full line of mid-mount platforms in 81', 95', and 100' configurations designed to fit in your station with numerous travel height options.

INDUSTRY LEADING PLATFORM DESIGN

KME's platform offers 22.8 cubic feet of space for four firefighters and equipment. A third door at the rear of the platform is standard on all midmount platforms for safer access onto the platform from the body.
