HRET (HIGH REACH EXTENDABLE TURRET)

TALON™

The Talon can be offered with any KME custom chassis or body configuration.

FEATURES

- Articulating Steel Booms
- Self Park Stowing Feature
- 1000 gpm Water Flow
- 10'-3" Outrigger Spread

The Talon offers many options to maximize fire scene capabilities, such as color and thermal image camera systems, elevated lighting and piercing nozzle.

COMPLIMENTS PUMPER/TANKER CONFIGURATION

The KME HRET is a multi-functional piece of apparatus on one vehicle with compartmentation of a pumper. Cutting down cost and maintenance on multiple apparatus.

ARTICULATING WATERWAY

The TALON™ provides an elevated 1000 gpm master stream that can be discharged from the main pump or an external water source. The electronically controlled waterway monitor can be controlled from a wireless control for maximum fire scene visibility.
