

CUSTOM PUMPER

Being one of the most crucial pieces of any fire departments fleet, pumpers today are responsible for water flow operations and many secondary functions such as rescue and EMT. With the increased demands put on many departments to do more with less, Ferrara will work with you to develop the exact pumper configuration that will help relieve the additional stress.

Featuring our custom chassis and extruded aluminum fire body, Ferrara's Custom Pumpers are built strong to stand the test of time. Many different pump and tank configurations are available along with endless equipment and ladder storage options.
