

## WILDLAND TYPE I & TYPE II

Regardless of the terrain and the obstacles that your response area puts in front of you, Ferrara has the Urban/Wildland Interface Apparatus to meet the needs of your response geography. Ferrara's lineup of 20 degree approach custom cabs will easily adapt to the toughest changes in terrain.

Our ability to offer highly customized designs along with our flexibility will create a functional, safe and versatile vehicle. These vehicles are available in 4X2 & 4X4 drivetrains with wheelbases that will allow tight turning radiuses required in Wildland Firefighting.
