BAD**

# PUMPER

**Best storage, value and versatility for first responders**

For more than 65 years, Fouts Bros has been delivering trucks. For the past 30 years, we've been producing custom fire trucks. Today, we remain family owned and committed to producing the highest quality stock models with fast delivery at an exceptional value, with popular options and custom features available.

## DEPENDABLE

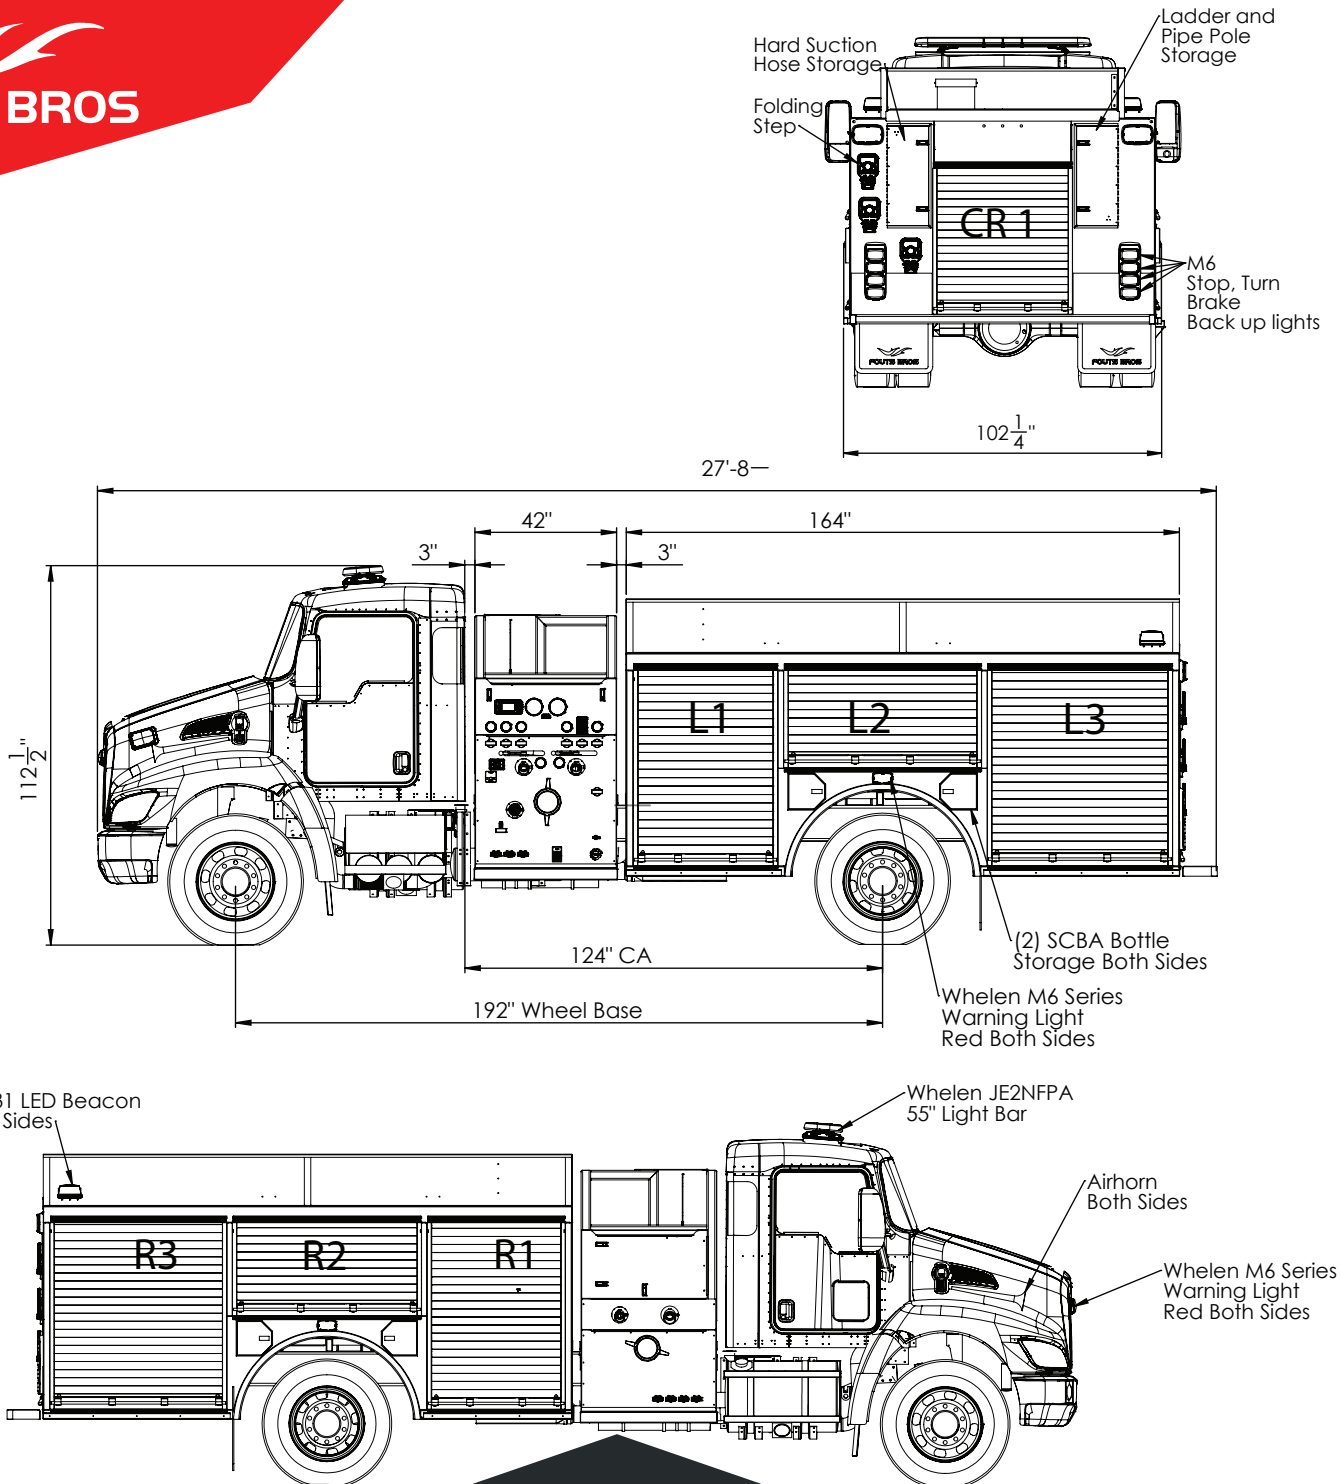

The Fouts Family remains committed to delivering the best value for your investment, on spec and on time, with features that deliver ease of operation, maintenance and training. Even after delivery, we're always here to back you up!

## VERSATILE

Our Pumpers allow you to combat all types of fire with a foam option. This is an excellent support vehicle for car accidents and all other emergencies. Our aluminum body reduces weight, so more equipment can be taken to the scene.

## EXPERIENCE

We've listened to you for over three decades and learned what options are most important to you and your team. Today, we continue to offer a time-tested library of options to give you the best apparatus to support fire, rescue and EMS calls.

# PUMPER
